

## Training Manuals and Online Resources

Tailoring Training and Information is the key to successful clinical improvement. Whether it be via our comprehensive training manuals and workbooks, online training tools, face to face inservice sessions or newsletters.

Our dedicated team of clinical pharmacists are always there to provide information and support in any area of medication management.

Some of our most acquired training sessions include:

- Antimicrobial Stewardship
- Pain Management
- Dementia and use of Psychotropics
- Crushing medications
- Schedule 8 management
- Diabetes in the elderly
- Medication administration- Best practice

## Medication Administration Workshops

**EzyMed** can provide workshops for correct medication administration for all levels of staff and in particular Assistants In Nursing (AIN). These workshops are designed to assist facility management in ensuring nursing staff are competent in the task of medication administration for

- All Dose Aid systems including Webster pack, multi dose sachet systems
- Non Packed items including inhalers/nebulisers, creams and ointments, patches, eye and ear preparations, liquids

## Medication Management Compliance

**EzyMed** has specialised and experience Clinical Pharmacists in assisting you with your Medication Management.

We have developed our own policies and procedure to fulfill all requirements of Aged Care standards 3 and 8 as well as support provision of optimal Quality Use of Medicines within RACFs.

Our Consulting **EzyMed** pharmacists will work closely with all allied health to become an active participant in the medical advisory committee (MAC) providing up to date drug and regulatory information incorporating clinical governance issues.

**EzyMed** provides a range of resources and activities that we have developed with our extensive experience in aged care.

## Who we are ?

**EzyMed** Medication Management is a professional Pharmacy Consulting service providing optimal Residential Medication Management Reviews (RMMRs) and facilitating one of the most comprehensive Quality Use of Medicines (QUMs) systems in aged care facilities.

**EzyMed** has been in operation for over 20 years providing clinical services in accordance with Best Practice & Governmental Guidelines.

**EzyMed** offers a live cloud based Medication Management Softwares providing transparency, control and comprehensive medication reporting for aged care facilities,

- comprehensive range of drug utilization reports
- Benchmarking drug data against other facilities
- Trending reports, monitoring your progress month to month.
- Multiple facilities and pharmacies in the same cloud based system.

and more ...

## Did you know EzyMed delivers a live and interactive Psychotropic Drug register?

Our Psychotropic Drug register is updated live and managed by facility clinical staff from any device. Real Time, Real Solutions with the appropriate tools in Medication Management.

*All our services are funded by the Federal Government with no added cost to the facility.*

## Residential medication Management Review

**Our Philosophy on MEDICATION REVIEWS Is to be comprehensive, collaborative and holistic.**

**Our services are backed by quality systems to ensure the continuity of care needed in complex medication regimes.**

- Smart electronic tracking and identification of patients at risk and requiring a medication review
- Automated referral system to Doctors and Nurse Practitioners
- RMMR portal with secure access to aged care providers and prescriber(s)
- Accredited pharmacists with experience and practical knowledge to deliver simple and effective medication management outcomes.

## Quality use of medicines

Our unique live software platform provides one source of key information where all healthcare providers can share medication management information.

Real time tracking of high-risk medications such as

- Psychotropic and Sedative Medications
- Cytotoxic and Narrow Therapeutic Window Medications
- Opioid and Anti-coagulant therapy
- And many other classes of medications.

## Peace of mind with ONE Complete Medication System providing

- Facility access to National Medication Charts
- High risk medication management
- Cloud based system to track all Psychotropics and Antimicrobials in line with requirements of the commission.

*“At EzyMed we pride ourselves in our responsibility to provide comprehensive Medication Management with innovative, informative and holistic approach to reach utmost Patient Centered Care.*

*We work in collaboration with prescribers, nursing staff and all allied health to deliver positive outcomes in all aspects of medication management.”*
